

Hyper Tech – Data Analytics & Business Intelligence Project → UI/UX

Dashboard UI/UX

The visual design of the dashboard was built to match the identity of the Hyper Tech brand. The neon green and black color palette was chosen specifically because it reflects the store's logo, giving the dashboard a unified and professional appearance. This creates strong brand consistency across all pages and makes the interface instantly recognizable to users.

Additionally, the navigation buttons and icons were selected from Flaticon.com, ensuring clean, modern, and high-quality visuals. These icons enhance usability, helping users quickly understand each section through clear visual cues.

Overall, the combination of the brand colors, minimalistic elements, and professional icons resulted in a dashboard that is visually appealing, easy to use, and perfectly aligned with Hyper Tech's identity.
